Post-medieval Pottery, 1650-1800 Dec 28 2022 The period from 1650 to 1800 is the most interesting and complex time in the development of English ceramics, with new types of pottery being developed all through that period, and with porcelain being made in Britain for the first time. Wares ranged from the simple, everyday

earthenwares of the local potters up to the sophisticated products of Staffordshire and the porcelain factories. This book combines the art-historical or collector's approach with archaeologically excavated material. Methods of production and decoration are explained, and contemporary imports discussed. Over a hundred pots are illustrated, and a further reading list is included. About the author Jo Draper was born in Hampshire. She has published many archaeological reports, and an even larger number of pottery reports. Archaeologically excavated pottery led her to an interest in all ceramics, especially those of the post-medieval period. Her work includes archaeology, museums, creating exhibitions and writing."

A History of the Medicines We Take Jan 25 2020 A History of the Medicines We Take gives a lively account of the development of medicines from traces of herbs found with the remains of Neanderthal man, to prescriptions written on clay tablets from Mesopotamia in the third millennium BC, to pure drugs extracted from plants in the nineteenth century to the latest biotechnology antibody products. The first ten chapters of the book in PART ONE give an account of the development of the active drugs from herbs used in early medicine, many of which are still in use, to the synthetic chemical drugs and modern biotechnology products. The remaining eight chapters in PART TWO tell the story of the developments in the preparations that patients take and their inventors, such as Christopher Wren, who gave the first intravenous injection in 1656, and William Brockedon who invented the tablet in 1843. The book traces the changes in patterns of prescribing from simple dosage forms, such as liquid mixtures, pills, ointments, lotions, poultices, powders for treating wounds, inhalations, eye drops, enemas, pessaries and suppositories mentioned in the Egyptian Ebers papyrus of 1550 BCE to the complex tablets, injections and inhalers in current use. Today nearly three-quarters of medicines dispensed to patients are tablets and capsules. A typical pharmacy now dispenses about as many prescriptions in a working day as a mid-nineteenth-century chemist did in a whole year.

Textiles in Archaeology Nov 22 2019 Growing enthusiasm for handspinning and weaving as studio crafts and increasing awareness of the value of organic materials have led to wider interest in archaeological textiles. Although textiles are not common finds, textile implements are, and this book shows how both contribute to our appreciation of a universal ancient craft. Geographically this book is concerned with Britain and Europe and in time ranges from the neolithic to the medieval period. The processes of spinning and weaving are explained and illustrated and the reader is taken through early textile manufacture. Unusual textile terms are explained and illustrated in a glossary.

Men of the Mary Rose Mar 07 2021 *The Mary Rose* was one of King Henry VIII's favourite warships until she sank during an engagement with the French fleet on 19 July 1545. Her rediscovery and raising were seminal events in the history of nautical archaeology. Apart from the Captain and the Vice Admiral, nothing is known about the crew of the *Mary Rose* - the only evidence about her complement of 415 men rests with their skeletal remains. In *The Men of the Mary Rose* A.J. Stirland uses archaeological and skeletal evidence to give the reader a welcome insight into the soldiers of the *Mary Rose*, from their ages and height to their health, diet and physical condition. This book examines the building, sinking and raising of the *Mary Rose* and her historical context, before moving on to the examination of what the remain of the crew can reveal to us about the fighting men of that period. Many new findings have been made through analysis of their bones, including the effects of some activities and occupations on the skeletons of the men. This is the first book to deal with the men who made up the crew of the *Mary Rose*. It provides an exciting glimpse of Tudor life and the Tudor navy, relating archaeological findings to existing documentary evidence, opening a fascinating window into one of Henry VIII's great ships and a frozen moment of sixteenth-century time. This book will appeal both to professionals in the area, and to those for whom Tudor history holds a general fascination.

Medieval Town Plans Sep 20 2019 Most English and Welsh towns were founded or grew rapidly in the later medieval period, in particular between the mid twelfth and early fourteenth centuries. This book begins by giving a brief outline of the great growth in the number and size of towns and outlines the archaeological, documentary and cartographic evidence that is available. It then goes on to relate that evidence to surviving and lost features in the townscape, with the aim of providing enough background material for the reader to be able to see why, when, where and how any medieval town grew. Particular topics covered include town sites, their overall layout, street patterns, defences (castles, walls and gates), markets, trades, churches, chapels, monasteries, suburbs, property boundaries and houses. Above all, this is a practical guide to the study of medieval town plans. Dr Paul Hindle took early retirement in 2000; he was previously a Senior Lecturer in Geography. He is Honorary Secretary of Manchester Geographical Society. He has written widely on roads, maps and the Lake District.

Astrology through History: Interpreting the Stars from Ancient Mesopotamia to the Present Dec 24 2019 Alphabetically arranged entries cover the history of astrology

from ancient Mesopotamia to the 21st century. In addition to surveying the Western tradition, the book explores Islamic, Indian, East Asian, and Mesoamerican astrology.

• Provides alphabetically arranged reference entries that delineate the historical and cultural significance of astrology from ancient Mesopotamia to the present • Directs direct users to additional sources of information via entry bibliographies • Offers sidebars offer additional facts from primary source documents • Incorporates a timeline to help readers to place astrological developments in chronological context • Features an introductory essay for a narrative overview of the history of astrology, priming readers on its cultural relevance

Looking Beyond the Castle Walls Aug 24 2022 In the early 16th century Weobley was described as 'a market town in Herefordshire, where is a goodly castell, but somewhat in decay'. Less than a century later, and based on a plan made by Silas Taylor, all that remained of the castle were a few walls, a series of robbed construction trenches and, maybe two substantial timber framed buildings referred to by Taylor as 'dwellings anciently'. As time passed, the history of the castle was lost, albeit temporarily.

Between 2001 and 2004, a project to uncover many unsolved questions concerning the origins, use and demise of the castle was undertaken by a multi-disciplinary team led by the editors of this volume. The project, funded by the Local Heritage Initiative and supported by volunteers, undertook a series of non-intrusive investigations as well as detailed studies into the history and development of this once medieval town.

Following the results of the surveys, strategic trenching was located in various locations in and around the castle. From this excavation was found an array of objects such as medieval pottery, coinage and metalwork along with significant structures 'including the foundations of a number of medieval buildings'. 'Looking beyond the Castle Walls' provides a detailed account of the methodology of each of the survey and excavation programmes that assisted in the unravelling some of the answers to this most complex of histories.

Maritime Archaeology and Social Relations Dec 16 2021 This book analyses British action in the Southern hemisphere in the late 18th century, examining two Royal Navy ships, one off the Argentinean coast and one off the Southeast Australian coast. The author goes beyond a descriptive analysis of wrecks by treating them and their cargoes as embodiments of 18th century social relations. The book challenges traditional approaches, providing a perspective that emphasises the richness, diversity and complexity of British action.

The Archaeology of Britain Jul 11 2021 A comprehensive and up-to-date introduction to all the archaeological periods covering Britain from early prehistory to the industrial revolution. It provides a one-stop textbook for the entire archaeology of

Britain.

How the State Controls Society Mar 27 2020 A discussion on how modern Society is controlled and directed by the State.

English Slip-decorated Earthenware at Williamsburg Nov 27 2022 Illustrated catalog of Colonial Williamsburg's slipware collection. This publication examines English slip-decorated earthenwares, many of which have an almost folk-like quality in their naivety of form and decoration.

Interpreting the English Village Dec 04 2020 An original and approachable account of how archaeology can tell the story of the English village. Shapwick lies in the middle of Somerset, next to the important monastic centre of Glastonbury: the abbey owned the manor for 800 years from the 8th to the 16th century and its abbots and officials had a great influence on the lives of the peasants who lived there. It is possible that abbot Dunstan, one of the great reformers of tenth century monasticism directed the planning of the village. The Shapwick Project examined the development and history of an English parish and village over a ten thousand-year period. This was a truly multi-disciplinary project. Not only were a battery of archaeological and historical techniques explored - such as field walking, test-pitting, archaeological excavation, aerial reconnaissance, documentary research and cartographic analysis - but numerous other techniques such as building analysis, dendrochronological dating and soil analysis were undertaken on a large scale. The result is a fascinating study about how the community lived and prospered in Shapwick. In addition we learn how a group of enthusiastic and dedicated scholars unravelled this story. As such there is much here to inspire and enthuse others who might want to embark on a landscape study of a parish or village area. Seven of the ten chapters begin with a fictional vignette to bring the story of the village to life. Text-boxes elucidate re-occurring themes and techniques. Extensively illustrated in colour including 100 full page images.

*Dictionary of Munster Women Writers 1800-2000 Feb 18 2022 This dictionary will make an important contribution the knowledge of writing in Munster in both Irish and English over the past 200 years. The dictionary has entries on 560 writers, including 220 in Irish. Each entry contains a bibliographical note, a list of key references, and a bibliography where applicable. * advances literary and cultural - as distinct from primarily historical - research on the region of Munster over the last two centuries * enables a new view, as a whole, of the work of women writers * juxtaposes the work of Irish, English-language, and bilingual writers, and thereby helps to develop an understanding of the province of Munster as a diverse cultural milieu, and focus on the role of regionality in the process of cultural creation The Munster Women Writers Project, based in the English Department at University College Cork, was a recovery project aiming to make available the basic materials for biographical and literary research and analysis on the extensive number of women writers with Munster backgrounds or strong Munster connections in the period 1800-2000. The objective was to make more information on these writers available for future literary historians, feminist critics and social historians to develop knowledge and understanding of this material. By making available the basic materials for scholarly research in this field, the project aims to help generate critical analysis of the role of regional, class and gender factors in the formation of writers, and the intersection of these factors in the nature of the work produced.*

Human Bones in Archaeology Jan 05 2021

The Battles of King Arthur Mar 19 2022 The ninth century Historia Brittonum is the first source that mentions Arthur and lists twelve battles, including the famous Badon Hill. Much ink has been spilt debating the identity and location of Arthur. This book will demonstrate that some of the battles can indeed be located with some confidence. Rather than fit a specific theory as to his identity the battles are placed in the fragmenting provincial, political and military context of the late fifth and early sixth century Britain. At a time of rapid changes in cultural identity and a significant increase in Germanic material culture and migration. These battles might be expected to be found along borders and in zones of potential conflict. Yet this is not what is discovered. In addition the simplistic idea of Romano-Britons holding back invading Anglo-Saxons is found wanting. Instead we discover a far more nuanced political and cultural situation. One with increasing evidence of continuation of land use and the indigenous population. The most Romanised and urbanised regions of the south and east are the very areas that experienced the arrival of Germanic settlement. The conclusion gives the reader a new insight into what sort of man Arthur was and the nature of the battles he fought.

The Handbook of British Archaeology Aug 12 2021 For over 25 years The Handbook of British Archaeology has been the foremost guide to archaeological methods, artefacts and monuments, providing clear explanations of all specialist terms used by archaeologists. This completely revised and updated edition is packed with the latest information and now includes the most recent developments in archaeological science. Meticulously researched, every section has been extensively updated by a team of experts. There are chapters devoted to each of the archaeological periods found in Britain, as well as two chapters on techniques and the nature of archaeological remains. All the common artefacts, types of sites and current theories and methods are covered. The growing interest in post-medieval and industrial archaeology is fully explored in a brand new section dealing with these crucial periods. Hundreds of new illustrations enable instant comparison and identification of objects and monuments - from Palaeolithic handaxes to post-medieval gravestones. Several maps pinpoint the key sites, and other features include an extensive bibliography and a detailed index. The Handbook of British Archaeology is the most comprehensive resource book available and is essential for anyone with an interest in the subject - from field archaeologists and academics to students, heritage professionals, Time Team followers and amateur enthusiasts.

Boudica's Odyssey in Early Modern England Feb 24 2020 This diachronic study of Boudica serves as a sourcebook of references to Boudica in the early modern period and gives an overview of the ways in which her story was processed and exploited by the different players of the times who wanted to give credence and support to their own belief systems. The author examines the different apparatus of state ideology which processed the social, religious and political representations of Boudica for public absorption and helped form the popular myth we have of Boudica today. By exploring images of the Briton warrior queen across two reigns which witnessed an act of political union and a move from English female rule (under Elizabeth I) to British/Scottish masculine rule (under James VI & I) the author conducts a critical cartography of the ways in which gender, colonialism and nationalism crystallised around this crucial historical figure. Concentrating on the original transmission and reception of the ancient texts the author analyses the historical works of Hector Boece, Raphael Holinshed and William Camden as well as the canonical literary figures of Edmund Spenser, William Shakespeare and John Fletcher. She also looks at aspects of other primary sources not covered in previous scholarship, such as Humphrey Llwyd's Breuiary of Britayne (1573), Petruccio Ubaldini's Le Vite delle donne illustri, del regno d'Inghilterra, e del regno di Scotia (1588) and Edmund Bolton's Nero Caesar (1624). Furthermore, she incorporates archaeological research relating to Boudica.

Time's Anvil Apr 08 2021 A personal and lyrical rediscovery of the history of England through archaeology and the imagination. History thrives on stories. TIME'S ANVIL explores archaeology's influence on what such stories say, how they are told, who tells them and how we listen. In a dazzlingly wide-ranging exploration, Richard Morris casts fresh light on three quarters of a million years of history in the place we now think of as England. Drawing upon genres that are usually pursued in isolation - like biography, poetry, or physics - he finds potent links between things we might imagine to be unrelated. His subjects range from humanity's roots to the destruction of the wildwood, from the first farmers to industrialization, and from Tudor drama to 20th-century conflict. Each topic sits at a different point along the continuum between epoch and the fleeting moment. In part, this is a history of archaeology; in part, too, it is a personal account of the author's history in archaeology. But mainly it is about how the past is read, and about what we bring to the reading as well as what we find. The result is a book that defies categorisation, but one which will by turns surprise, enthral and provoke anyone who cares for England, who we are and where we have come from. TIME'S ANVIL was longlisted for the Samuel Johnson Prize for Non-Fiction 2013.

Historical and Archaeological Perspectives on Gender Transformations Oct 22 2019 In many facets of Western culture, including archaeology, there remains a legacy of perceiving gender divisions as natural, innate, and biological in origin. This belief follows that men are naturally pre-disposed to public, intellectual pursuits, while women are innately designed to care for the home and take care of children. In the interpretation of material culture, accepted notions of gender roles are often applied to new findings: the dichotomy between the domestic sphere of women and the public sphere of men can color interpretations of new materials. In this innovative volume, the contributors focus explicitly on analyzing the materiality of historic changes in the domestic sphere around the world. Combining a global scope with great temporal depth, chapters in the volume explore how gender ideologies, identities, relationships, power dynamics, and practices were materially changed in the past, thus showing how they could be changed in the future.

Excavations at North Shoebury May 21 2022 The North Shoebury Project was mounted in response to the accumulating evidence for settlement in the Southend Peninsula during virtually all periods from the prehistoric to the present day, especially widespread and possibly continuous from the Neolithic. The site itself lay on a brickearth covered gravel terrace, whose calcareous nature resulted in the preservation of bone and shell. This excavation report includes discussion of the evidence for occupation in each period, and a gazetteer of antiquities of the region.

Medieval Tailor's Assistant Feb 06 2021 The Medieval Tailor's Assistant is the standard work for both amateurs and professionals wishing to re-create the clothing of the Medieval era for historical interpretation or drama. This new edition extends its range with details of fitting different figures and many more patterns for main garments and accessories from 1100 to 1480. It includes simple instructions for plain garments, as well as more complex patterns and adaptations for experienced sewers. Advice on planning outfits and materials to use is given along with a range of projects and alternative designs, from undergarments to outer wear. Early and later tailoring methods are also covered within the period. There are clear line drawings, pattern diagrams and layouts and over eighty full-colour photographs that show the garments as working outfits. The garments are presented with brief notes on their historical background in three main layers, underwear, main garments and outer garments for men, women and children. There is a section on 'How to use the book' with detailed instructions on techniques, planning, materials and, in particular, cutting methods from 1100. In this new edition there are over 400 line illustrations and a further 80 colour photographs as well as patterns for 151 garments and accessories.

The Archaeology of Medieval Europe 1 May 29 2020 The two volumes of The Archaeology of Medieval Europe will together comprise the first complete account of medieval archaeology across Europe. Archaeologists from academic institutions in fifteen countries are collaborating to produce these two books of sixteen thematic chapters each. In addition, every chapter will feature a number of 'box-texts', by specialist contributors, highlighting sites or themes of particular importance. The books will be comprehensively illustrated throughout, in both colour and b/w, including line drawings and specially commissioned maps. This ground-breaking set, which is divided chronologically into two (Vol. 1 extending from the Eighth to Twelfth Centuries AD, and Vol. 2 from the Twelfth to Sixteenth Centuries - to appear 2008), will enable readers to track the development of different cultures, and of regional characteristics, throughout the full extent of medieval Catholic Europe. In addition to revealing shared contexts and technological developments, the complete work will also provide the opportunity for demonstrating the differences that were inevitably present across the Continent - from Iceland to Italy, and from Portugal to Finland - and to study why such differences existed.
