In prehistoric times, man's primary quest, like every other animal's was to simply survive and thrive in a world that had many hostile elements and competing species. Like every other living thing, we simply wanted to live on our terms. But then, Ancient Men started to live in communities and societies that rewarded the bravest and strongest of men. The superior hunter could provide more food for his family; weaker hunters lived on the scraps of braver men. And that began the unending quest and competition for success that exists till today. Today, beyond survival, every man on Planet Earth wants to be successful and happy. That is why we do every single thing we do. We put our kids in school to gain an education that can put them a yard ahead of every other person around them. We get up every morning to take another shot at that boring work because we are after success. You work hard as you do because you have goals to meet. These goals could be long-term like earning a managerial role or as short-term as earning your next wage to settle bills. My point is that everything we do is an attempt to be successful at the goals we have set. The only other thing we chase as much as success is happiness and stability. For these two things, we are all willing to go the extra mile. Yet, despite our best efforts, life seems to have its own formula for sharing success and happiness among us. For every Thomas Edison, there are millions of people with great ideas that will never be translated into an invention. For every Bill Gates, there are many people out there struggling to find their feet and live a life of contentment. For every Cristiano Ronaldo, Beyoncé, Adele or Elon Musk, there are countless others who consistently fail to achieve their goals. They are forever stuck in mediocrity and the monotony of failure. What do Cristiano Ronaldo, Beyoncé and Muhammed Ali possess in common that the average man on the street lacks? What is the secret behind their repeated success when every other Tom and Harry can barely meet his weekly target? The answer lies in the mindset that these winners have developed. Yes, with the right mindset and lifestyle choices, you can finally cut down the odds in your favor. You can finally choose what happens to you when you have the right mindset and habits. Self-improvement is the bedrock of the mentality of winners. They are constantly on the lookout for ways to be better at what they already do. Every day, they take a little step but they take that step in the right direction always. So, they start each new day on an improved note. And that's what I need you to do. Your transformation relies on three main pillars - building the right mindset, choosing the right goals and developing routines and habits that can get you to your goals. That is what the eight chapters in this book are built around. The right mindset is the vehicle for your goals; choosing the right goals is a key factor and I will show you habit management hacks that will change the way you approach your work and day. I have a promise to make. At the end of this book, I am 110% sure that you will be ready to transform and take back control of your life. I promise to provide the knowledge you need to do that. However, you must make a promise to me to act upon the knowledge contained in this book. As Pablo Picasso said, "Action is the foundational element of success." You need to act. Are you ready to embark on the most important journey of your life so far? Turn to the next chapter and start investing in your strengths NOW! Good Luck! As the recession deepens, with a downturn in spending, rise in defaulting mortgages and throttling of credit, a Go-Go economy has transitioned to a Uh-Oh economy. How did we get here and what does it mean for individuals and families? The New Frugality lays out how Americans have overspent-and offers a way out through consuming less and saving more-showing that living simply is not just living "cheaply." What is required is a paradigm shift. We need to learn to live more modestly by cutting back on spending, actually attempting to live within our means and increasing savings. Farrell outlines creative new ways of thinking that can help us to accomplish this, not just by reverting to earlier financial models, but by innovating new solutions that are appropriate to the times we live in. In some ways, The New Frugality is the fiscal equivalent of the green movement; and indeed, going green is also part of the project. In The New Frugality Farrell will show where the economy is going, how it will affect regular families, and how they can weather the storm. Have you ever looked around at your friend and family and wondered how they seem to constantly achieve their goals while you seem to be standing still? She saw what other moms had—vacations, birthday parties, a house full of furniture—and felt ashamed that she and her son lived in a small apartment and ate dinner on the floor. Worse, when her feelings began to exhaust her, she binge-shopped, reasoning that she'd feel better after a trip to the mall. Guilt is the problem. Society's expectations for her are the problem. She is the solution. Once she reversed the negative thinking patterns pushing her toward decisions that didn't serve her values or goals, her financial plan wrote itself. Now, she's not only living debt-free in her dream home, which she paid for in cash, but she has spread her teachings around the world and helped countless women envision better lives for themselves and their families. Now, building on the lessons she's taught millions as the founder of *The Budget Mom*, she shares a step by step plan for taking control back over your financial life—regardless of your level of income or your credit card balance. The United States

Government has made trillions of dollars in unfunded promises for programs like Social Security and Medicare—and the only way to deliver on these promises is to raise taxes. Some experts have even suggested that tax rates will need to double, just to keep our country solvent. Unfortunately, if you're like most Americans, you've saved the majority of your retirement assets in tax-deferred vehicles like 401(k)s and IRAs. If tax rates go up, how much of your hard-earned money will you really get to keep? In *The Power of Zero*, McKnight provides a concise, step-by-step roadmap on how to get to the 0% tax bracket by the time you retire, effectively eliminating tax rate risk from your retirement picture. Now, in this expanded edition, McKnight has updated the book with a new chapter on the 2017 Tax Cuts and Jobs Act, showing readers how to navigate the new tax law in its first year of being in effect, and how they can extend the life of their retirement savings by taking advantage of it now. This one's special!"—Jim Cramer, host of CNBC's *Mad Money* "Great tools for anyone wanting to dabble in the stock market."—USA Today Phil Town is a very wealthy man, but he wasn't always. In fact, he was living on a salary of \$4,000 a year when some well-timed advice launched him down a highway of investing self-education that revealed what the true "rules" are and how to make them work in one's favor. Chief among them, of course, is Rule #1: "Don't lose money." In this updated edition to the #1 national bestseller, you'll learn more of Phil's fresh, think-outside-the-box rules, including: • Don't diversify • Only buy a stock when it's on sale • Think long term—but act short term to maximize your return • And most of all, beat the big investors at their own game by using the tools designed for them! As Phil demonstrates in these pages, giant mutual funds can't help but regress to the mean—and as we've all learned in recent years, that mean could be very disappointing indeed. Fortunately, Rule #1 takes readers step-by-step through a do-it-yourself process, equipping even the biggest investing-phobes with the tools they need to make quantum leaps toward financial security—regardless of where the market is headed.
