UHV Transmission Technology Aug 12 2021 UHV Transmission Technology enables power system employees and the vast majority of those caring for UHV transmission technology to understand and master key technologies of UHV transmission. This book can be used as a technical reference and guide for future UHV projects. UHV transmission has many advantages for new power networks due to its capacity, long distance potential, high efficiency and low loss. Development of UHV transmission technology is led by infrastructure development and renewal, as well as smart grid developments, which can use UHV power networks as the transmission backbone for hydropower, coal, nuclear power and large renewable energy bases. UHV is a key enabling technology for optimal allocation of resources across large geographic areas, and has a key role to play in reducing pressure on energy and land resources. Provides a complete reference on the latest ultra-high voltage transmission technologies Covers practical applications made possible by theoretical material, extensive proofs, applied systems examples and real world implementations, including coverage of problem solving and design and manufacturing guidance Includes case studies of AC and DC demonstration projects Features input from a world-leading UHV team

On Light and Other High Frequency Phenomena Jan 25 2020 On Light and Other High Frequency Phenomena is a lecture by Nikola Tesla. He presents his attempts to develop a wireless lighting system based on near-field inductive and capacitive coupling.

Foundry Management & Technology Sep 13 2021

My Inventions Sep 01 2020 In 1919, Nikola Tesla wrote several articles for the magazine The Electrical Experimenter. These pieces have been gathered together here. In the last few decades of his life, he ended up living in diminished circumstances as a recluse in Room 3327 of the New Yorker Hotel, occasionally making unusual statements to the press. Because of his pronouncements and the nature of his work over the years, Tesla gained a reputation in popular culture as the archetypal 'mad scientist'. He died impoverished and in debt on January 7, 1943. When he passed, Tesla didn't leave behind much material for the general public. Also, he didn't have many close friends who would have had insight into his life sufficient to write about him. Since My Inventions is an autobiography, it is unique in providing a glimpse into Tesla's mind and his private thoughts. It tells about the man, his motivations and the values that he held. My Inventions is a required read for anyone wanting to know more about one of the greatest inventors of the 20th century - and perhaps of all time. Contents - My Early Life - My First Efforts at Invention - My Later Endeavors - The Discovery of the Tesla Coil and Transformer - The Magnifying Transmitter - The Art of Telautomatics

Diapasones para la Salud: Práctica clínica Sonopuntura Jan 05 2021 Historia del diapasón, aplicaciones médicas como audiometría, pie diabético, fracturas, fisioterapia, quiropraxia. Aplicaciones terapéuticas del diapasón en contracturas, meridianos, reflexología, chakras, relajación y meditación. Consejos y formas de uso del diapasón, así como la descripción de algunos de los diapasones más usados en sanación. Incluye código de descuento para la compra de diapasones y formación online.

Prayer Nov 22 2019 This powerful book reveals how and why the power of faithful prayer works in a very real way and how it is the answer to the world's problems and our personal lives...

Ramonst Feb 18 2022 Hidden in the mountains of East Tennessee, an eleven-year old goes about the business of being a boy during the summer of 1970. Within a balance of terror and innocence, he bears silent witness to ghosts of the dead and the cruelties of a teenage killer while local justice plays out in a community carved from legacies of coal mining and religion.

Proton Exchange Membrane Fuel Cells Sep 25 2022 Clean energy technologies are poised to play an important role in overcoming fossil fuel exhaustion and global pollution. Among these technologies, electrochemical energy storage and conversion are considered to be the most feasible, sustainable, and environmentally friendly. Proton exchange membrane (PEM) fuel cells are prime examples of electrochemical energy conversion technologies in action. Believed to be ideal sources of clean power, PEM fuel cells are replacing internal combustion and diesel engines in vehicles, as well as Pb-acid batteries and diesel generators in the emergency backup of telecommunications base stations and computer centers. Written by an industry-leading scientist, Proton Exchange Membrane Fuel Cells explains the theoretical foundations of PEM fuel cells in relation to practical design and operation to not only help beginners grasp the essentials, but also guide industry professionals in tackling technical challenges. Useful to scientists, researchers, students, academics, and practicing engineers, the book covers the fundamentals, materials, components, modules, system architecture, applications, and current developmental status; offers real-world examples; and provides insight into advancing this sustainable clean technology.

Pyridines: from lab to production Oct 22 2019 Provides a synthetic armory of tools to aid the practicing chemist by reviewing the most reliable historical methods alongside new methods/ Written by scientists who have actually used these in synthesis. By emphasizing tricks and tips to optimize reactions for the best yields and purity, which are often missing from the primary literature, this book provides another dimension for the synthetic chemist. A combined academic and industrial approach evaluates the best methods for different scales of reaction and discusses practical tips (e.g. when to stop a reaction early to maximize purity or when to re-use side products). Chapters also assess whether to make or source starting materials, how to connect them and what are the best synthetic routes. The book is designed to be a stand-alone reference, but also provides cross references to leading reviews and the Comprehensive Heterocyclic Chemistry reference works for those who want to learn more. Reviews tried and tested practical methods to help the reader select the best method for their research Includes tips, tricks and hints to enable the reader to get the best yield or cleanest product out of their reaction for synthesising or transforming a pyridine derivative Written by both academic researchers and industry leaders this provides a unique view of how to get the most out of a reaction no matter what scale you are running this on

Peace with the Psalms Oct 02 2020 For those seeking contentment and comfort in even the most trying circumstances of life, Peace with the Psalms offers guided readings rooted in Christian meditation. We live in a busy world; from work and family obligations to friendships and faith, daily life can sometimes make us dizzy with stress or overcome with worry. And though many of us try to slow down, it can be difficult to calm our minds and tune our hearts into the messages that matter most. But the good news is that peace and comfort are attainable, even when your heart is at its most restless. In Peace with the Psalms, authors from Abide

Christian Meditation--the world's most popular Christian meditation app--lead you through the best of the Psalms so you can find peace and renewal in God's promises. In each of 40 carefully crafted biblical meditations that include Scripture, a guided reflection, and a prayer, you will learn to: Shift your focus from today's circumstances to the promises of God Experience the principle of patience, reassuring believers in the darkest times Find rest by memorizing and repeating key verses and passages Overcome the common resistance to joy that comes from overactivity Engage your senses in imagining the word pictures of the Psalms No matter what you're going through, Peace with the Psalms offers comfort from God's Word. By reflecting on the biblical messages in these pages, you'll remember each day that God is near.

Healing at the Speed of Sound Dec 24 2019 Use the music you love to become more efficient, relaxed, healthy, and happy. At this very moment, you are surrounded by sound. Pause for a minute and try to listen to it all: the chatter of a passing conversation, the gentle whoosh of air vents, noise from a nearby street. We rarely pay attention to all that we hear, but every noise in our environment has the ability to affect our mood, our productivity, even our health—for better and for worse. Drawing on a decade's worth of groundbreaking brain science and research, bestselling author Don Campbell and sound expert Alex Doman's *Healing at the Speed of Sound®* provides practical advice, exercises, and over 100 interactive links that help you create the perfect soundtrack for every task and enjoy a full, rich, and truly harmonious life.

Noise and Torsional Vibration Analysis of Hybrid Vehicles Mar 19 2022 Thanks to the potential of reducing fuel consumption and emissions, hybrid electric vehicles (HEVs) have been attracting more and more attention from car manufacturers and researchers. Due to involving two energy sources, i.e., engine and battery, the powertrain in HEVs is a complicated electromechanical coupling system that generates noise and vibration different from that of a traditional vehicle. Accordingly, it is very important to explore the noise and vibration characteristics of HEVs. In this book, a hybrid vehicle with two motors is taken as an example, consisting of a compound planetary gear set (CPGS) as the power-split device, to analyze the noise and vibration characteristics. It is specifically intended for graduates and anyone with an interest in the electrification of full hybrid vehicles. The book begins with the research background and significance of the HEV. The second chapter presents the structural description and working principal of the target hybrid vehicle. Chapter 3 highlights the noise, vibration, and harshness (NVH) tests and corresponding analysis of the hybrid powertrain. Chapter 4 provides transmission system parameters and meshing stiffness calculation. Chapter 5 discusses the mathematical modeling and analyzes torsional vibration (TV) of HEVs. Finally, modeling of the hybrid powertrain with ADAMS is given in Chapter 6.

Healing Codes for the Biological Apocalypse Jun 10 2021

The Golden Key Jul 31 2020 I have compressed this essay into a few pages. Had it been possible I would have reduced it to as many lines. It is not meant to be an instructional treatise, but a practical recipe for getting out of trouble. Study and research are well in their own time and place, but no amount of either will get you out of a concrete difficulty. Nothing but practical work in your own consciousness will do that. The mistake made by many people, when things go wrong, is to skim through book after book, without getting anywhere. Read the Golden Key several times. Do exactly what it says, and if you are persistent enough you will overcome any difficulty.

Meeting the Lyre Mar 07 2021

The Way to the Kingdom (Unabridged) Jun 29 2020 This carefully crafted ebook: "The Way to the Kingdom (Unabridged)" is formatted for your eReader with a functional and detailed table of contents. Joseph Benner (1872-1938) was an American author, Spiritual writer, and Representative of the Brotherhood of Christ who used the pen name "Anonymous." He was the first to introduce the Knowledge and Teachings of the Impersonal Life (also known as the "I AM" Teaching) to the world in his first book, "The Impersonal Life". Benner taught that Christ's proclaiming "I AM" indicated "the true spirit that resides in every human being."

A Treatise of the Natural Grounds, and Principles of Harmony Dec 16 2021

Student Guide and Solutions Manual to Accompany Ternay's Contemporary Organic Chemistry Aug 24 2022

Making Babies Jun 22 2022 MAKING BABIES THE MUST-HAVE BOOK FOR REPRODUCTIVE ISSUES -Making Babies is a thorough and comprehensive compilation of up-to-date scientific research, blended with a wealth of informative, empirical practical knowledge, and is packed full of relevant self-help information that has something to suit everyone. This book has been combined to offer you a 'warts and all' overview of both the medical approach to reproductive dysfunctions and the effective benefits that holistic, natural medicines and conventional, orthodox medicine can have on influencing your reproductive health, general wellbeing and gender selection. -Making Babies is an easy-to-read guide that covers in-depth descriptions of all the major medical and complementart therapies from acupuncture, diet, clinical nutrition, herbal medicine, homeopathy, medically assisted technology, surgical procedures, IVF, prescription medications and much more. This book is essential reading that will assist in preparing and educating you on the various causal factors, medical conditions and all the very latest in treatment protocols from both medicine and complementary natural medicine. -Some of the topics covered include: Endometriosis, miscarriage prevention, PCOS, PMS, fibroids, menstrual dysfunction, hormone imbalances, male reproductive disorders, detoxification, general wellbeing, stress management, relationship dynamics, pregnancy support, and fertility boosting techniques. Learn of new and traditional methods that available today that can improve both you and your partner's pre-and post-conception health care, optimise fertility success and influence the future generational health of your offspring. Making Babies is an invaluable guide that can assist you to resolve your reproductive problems and help you manage your way through the complexities of the infertility maze.

A Semiotic Approach to Open Notations Nov 27 2022 Along with twentieth-century developments in playing techniques, technologies, and concepts of musical sound, the notations employed by composers have also changed. Composers of what Umberto Eco calls 'open works' often employ intentionally ambiguous music notations. These open notations ask the performer to play a radical and active role in co-creating the musical work. Scores that feature open notations have been part of the Western classical music landscape since the mid-twentieth century, and continue to have a vibrant community of practitioners today. In this Element, Tristan McKay considers intersections of ambiguity, authority, and identity in works with open notations. He develops a semiotic approach to open notation analysis and puts it into practice with in-depth analyses of openly notated works by Earle Brown, Will Redman, and Leah Asher.

Tesla May 29 2020 In this "informative and delightful" (American Scientist) biography, Margaret Cheney explores the brilliant and prescient mind of Nikola Tesla, one of the twentieth century's greatest scientists and inventors. In *Tesla: Man Out of Time*, Margaret Cheney explores the brilliant and prescient mind of one of the twentieth century's greatest scientists and inventors. Called a madman by his enemies, a genius by others, and an enigma by nearly everyone, Nikola Tesla was, without a doubt, a trailblazing inventor who created astonishing, sometimes world-transforming devices that were virtually without theoretical precedent. Tesla not only discovered the rotating magnetic field -- the basis of most alternating-current machinery -- but also introduced us to the fundamentals of robotics, computers, and missile science. Almost supernaturally gifted, unfailingly flamboyant and neurotic, Tesla was troubled by an array of compulsions and phobias and was fond of extravagant, visionary experimentations. He was also a popular man-about-town, admired by men as diverse as Mark Twain and George Westinghouse, and adored by scores of society beauties. From Tesla's childhood in Yugoslavia to his death in New York in the 1940s, Cheney paints a compelling human portrait and chronicles a lifetime of discoveries that radically altered -- and continue to alter -- the world in which we live. *Tesla: Man Out of Time* is an in-depth look at the seminal accomplishments of a scientific wizard and a thoughtful examination of the obsessions and eccentricities of the man behind the science.

The Cosmic Octave Oct 26 2022

College Physics Jul 11 2021 "College Physics," Second Edition is the best solution for today's college physics market. With a unique, new, approach to physics that builds a conceptual framework as motivation for the physical principles, consistent problem solving coverage strategies, stunning art, extensive end-of-chapter material, and superior media support, Giambattista, Richardson, and Richardson delivers a product that

addresses today's market needs with the best tools available..

The Art of Modeling Mechanical Systems Apr 20 2022 The papers in this volume present rules for mechanical models in a general systematic way, always in combination with small and large examples, many from industry, illustrating the most important features of modeling. The best way to reach a good solution is discussed. The papers address researchers and engineers from academia and from industry, doctoral students and postdocs, working in the fields of mechanical, civil and electrical engineering as well as in fields like applied physics or applied mathematics.

How the world can be improved Apr 27 2020 If we want to improve life on earth and our own lives, it is necessary to find a new guide: one that can meet the challenges of our time and of the future. The old guides were good in principle, but have become bogged down in calcified structures, often accomplishing the opposite of what was originally intended. The development of society makes it necessary to find new guiding principles from time to time. To do so, however, we need to know what the history was, how the present society is structured, and how it is likely to develop. The author aims to discover this by highlighting the following topics: Information: truth and lies Conspiracies: real and imagined conspiracies Nodes and choices: in history and as individuals Education Religions Cultures and subcultures Good and evil Resolving conflicts Freedom Justice Security How a poor country can become rich. Nature and the environment and global warming Art Creativity The meaning of life Peace Reform of the United Nations Health: Physical and mental Advice on how to become happy What ultimately matters is how to safeguard and promote life on earth. According to the author, making the right choice at certain crucial moments (called "nodes") is of great importance. Ultimately, it is about love and the unity of all and everything,

The Aaron/Q'uo Dialogues Nov 15 2021 Inspired by the breakthrough channeled series The Law of One, Buddhist teacher Barbara Brodsky sent its author, Carla L. Rueckert, some transcriptions of her own material. Struck by Brodsky's lucid, witty, and fearless channeling, Rueckert invited Brodsky to co-channel a conversation between their spirit teachers, Q'uo and Aaron. Developed from the transcripts of nine weekends of joint channeling, The Aaron/Q'uo Dialogues: An Extraordinary Conversation between Two Spiritual Guides offers teachings from a "positive polarity" perspective, and provides answers to a wide range of spiritual questions, such as: • "What is the spiritual path and how do we live it?" • "Why do seemingly bad things happen to people who are trying to follow the dictates of love?" • "How do we open the heart?" Offering wise solutions to the major problems that prevent people from living with more awareness and compassion, these conversations offer the spiritual seeker a valuable template for a life of spiritual peace. Barbara Brodsky is a nationally known Buddhist teacher and the founder of Deep Spring Center. www.deepspring.org. Carla L. Rueckert is best known for her channeling of The Law of One, also called The Ra Material. www.lresearch.org

OGT Reading Apr 08 2021 OGT Exit Level Reading Workbook prepares students for the reading portion of the Ohio Graduation Test. Samples from similar tests provide plenty of practice and students learn to take multiple choice tests on their comprehension of what they read. Students learn to evaluate their own short answers to targeted questions, and learn from other students' responses to similar questions. This book is suitable for students in all states who need to take a reading exam for graduation or course completion.

The Reality Revolution Dec 28 2022 Our world is undergoing a reality revolution. More and more people are discovering the power of their minds to shape the world around them faster than ever before. The question is: how do you create the reality of your design? Brian Scott wants to help you find the answer. After walking away unscathed from a near-fatal shooting in his home, Brian began a fanatical search for answers. He deepened his research into parallel realities, quantum mechanics, and consciousness to uncover what happened in his close call with death. Along the way, he developed a series of techniques capable of creating profound transformations. In The Reality Revolution: The Mind-Blowing Movement to Hack Your Reality, Brian introduces you to the techniques that have helped his clients find lasting love, create wealth, and revitalize health. You'll learn how to surf through parallel realities and unlock the power of your mind through a mix of researched and science-backed techniques like qi gong, meditation, quantum jumping, energy work, and reality transurfing. If you're ready to create an incredible reality for yourself, this book shows you the way.

The Smallest Biomolecules: Diatomics and their Interactions with Heme Proteins Dec 04 2020 This is not a book on NO biology, nor about hemoglobin, nor about heme-based sensors per se. Of course, it covers all these topics and more, but above all, it aims at providing a truly multidisciplinary perspective of heme-diatom interactions. The overarching goal is to build bridges among disciplines, to bring about a meeting of minds. The contributors to this book hail from diverse university departments and disciplines - chemistry, biochemistry, molecular biology, microbiology, zoology, physics, medicine and surgery, bringing with them very different views of heme-diatom interactions. The hope is that the juxtaposition of this diversity will lead to increased exchanges of ideas, approaches, and techniques across traditional disciplinary boundaries. The authors represent a veritable Who's Who of heme protein research and include John Olson, Tom Spiro, Walter Zumft, F. Ann Walker, Teizo Kitagawa, W. Robert Scheidt, Pat Farmer, Marie-Alda Gilles-Gonzalez, and many other equally distinguished scientists. Extremely distinguished list of authors Multidisciplinary character - equally suitable for chemists and biochemists Covers the hottest topics in heme protein research: sensors, NO biology, new roles of hemoglobin, etc.

Healing Sounds Feb 06 2021 The first book to explain from both scientific and spiritual perspectives the healing and transformative powers of harmonics. • Includes practical exercises demonstrating how to use sound in healing and meditation, including "Vowels as Mantras" and "Overtoneing". • Describes how harmonics can be used as "sonic yoga" for meditation and deep relaxation to enhance energy. • Over 25,000 copies of first editions sold in 6 languages. • Author won 1999 Visionary Awards for Best Healing-Meditation Album. The Mystery Schools of Egypt, Greece, and Rome understood that vibration is the fundamental active force in the universe and developed specific chants and tones for healing the mind, body, and spirit and achieving altered states of consciousness. Overtone chanting--also called vocal harmonics--is the ability of the human voice to create two or more notes at the same time. Healing Sounds explains how to perform vocal harmonics and experience their transformative and curative powers. An internationally recognized master teacher, the author provides diverse examples of sound healing systems incorporating both mystical and medical traditions--from Tibetan monks' use of tantric harmonics to Dr. Alfred Tomatis' use of Gregorian chanting--and their capacity to affect us on all levels. With many easy-to-follow exercises, Healing Sounds is the first book to show from both the scientific and spiritual viewpoints how to use the transformative power of sound for healing on physical, emotional, mental, and spiritual levels.

The Art of Talk Aug 20 2019 Intensely private radio personality Art Bell, who lives in the middle of the desert 65 miles west of Las Vegas--where he broadcasts his radio shows--finally comes forward with his fascinating autobiography.

Intervals, Scales, Tones and the Concert Pitch C May 09 2021 Why is it that certain intervals, scales, and tones sound genuine, while others sound false? Is the modern person able to experience a qualitative difference in a tone's pitch? If so, what are the implications for modern concert pitch and how instruments of fixed tuning are tuned? Renold tackles these and many other questions and provides a wealth of scientific data. Her pioneering work is the result of a lifetime of research into the Classical Greek origin of Western music and the search for modern developments. She deepens our musical understanding by using Rudolf Steiner's spiritual science as a basis, and she elucidates many of his puzzling statements about music. The results of her work include the following discoveries: - The octave has two sizes (a 'genuine' sounding octave is bigger than the "perfect octave") - There are three sizes of "perfect fifths" - An underlying "form principle" for all scales can be found - Equal temperament is not the most satisfactory method of tuning a piano - She provides a basis for some of Steiner's statements, such as, "C is always prime" and "C = 128 Hz = Sun." Intervals, Scales, Tones is a valuable resource for those who wish to understand the deeper, spiritual aspects of music.

Intervals, Scales, Tones and the Concert Pitch C May 21 2022 Why is it that certain intervals, scales, and tones sound genuine, while others sound false? Is the modern person able to experience a qualitative difference

in a tone's pitch? If so, what are the implications for modern concert pitch and how instruments of fixed tuning are tuned? Renold tackles these and many other questions and provides a wealth of scientific data. Her pioneering work is the result of a lifetime of research into the Classical Greek origin of Western music and the search for modern developments. She deepens our musical understanding by using Rudolf Steiner's spiritual science as a basis, and she elucidates many of his puzzling statements about music. The results of her work include the following discoveries: The octave has two sizes (a 'genuine' sounding octave is bigger than the "perfect octave"). There are three sizes of "perfect fifths." An underlying "form principle" for all scales can be found. Equal temperament is not the most satisfactory method of tuning a piano. She provides a basis for some of Steiner's statements, such as, "C is always prime," and "C = 128 Hz = Sun." Here is a valuable resource for those who wish to understand the deeper, spiritual aspects of music.

Ukulele For Dummies Nov 03 2020 Learn everything ukulele—from chord progressions to playing pop, folk, and holiday favorites—and, yes, even Hawaiian music! The ukulele is hot. The season one finale of *Glee* featured a ukulele. The recent hit song "Hey Soul Sister" by Train includes the dulcet tones of a uke. Not to mention the runaway success of the Ukulele Orchestra of Great Britain. For anyone wishing to master this fun, surprisingly versatile instrument, *Ukulele For Dummies* covers all the basics—from chords and strumming patterns to guidance on finger-picking. The print version of the book includes a CD with audio tracks of the entire musical notation in the book—creating a total musical instruction package Offers instruction in a variety of styles—including pop, folk, holiday favorites, and Hawaiian music Features a buying guide for the novice—with tips on purchasing a ukulele plus other necessary accessories With its simple and clear instruction, and inspiration on every page, *Ukulele For Dummies* will have fans and first-time musicians making beautiful music—as they tiptoe through the tulips—in no time. Note: CD files are available to download after purchasing the e-Book version

The Ancient Science of Mantras Feb 24 2020

Advances in Material Science and Engineering Jan 17 2022 This book presents selected papers from the 6th International Conference on Mechanical, Manufacturing and Plant Engineering (ICMMPE 2020), held virtually via Google Meet. It highlights the latest advances in the emerging area, brings together researchers and professionals in the field and provides a valuable platform for exchanging ideas and fostering collaboration. Joining technologies could be changed to manufacturing technologies. Addressing real-world problems concerning joining technologies that are at the heart of various manufacturing sectors, the respective papers present the outcomes of the latest experimental and numerical work on problems in soldering, arc welding and solid-state joining technologies.

Harmonic Experience Jul 23 2022 An exploration of musical harmony from its ancient fundamentals to its most complex modern progressions, addressing how and why it resonates emotionally and spiritually in the individual. W. A. Mathieu, an accomplished author and recording artist, presents a way of learning music that reconnects modern-day musicians with the source from which music was originally generated. As the author states, "The rules of music—including counterpoint and harmony--were not formed in our brains but in the resonance chambers of our bodies." His theory of music reconciles the ancient harmonic system of just intonation with the modern system of twelve-tone temperament. Saying that the way we think music is far from the way we do music, Mathieu explains why certain combinations of sounds are experienced by the listener as harmonious. His prose often resembles the rhythms and cadences of music itself, and his many musical examples allow readers to discover their own musical responses.

Fundamentals of Flight Oct 14 2021

Parkland Speaks Sep 20 2019 Featuring art and writing from the students of the Parkland tragedy, this is a raw look at the events of February 14, and a poignant representation of grief, healing, and hope. The students of Marjory Stoneman Douglas High School share their emotional journeys that began on February 14, 2018, and continue today. This revealing and unfiltered look at teens living in the wake of tragedy is a poignant representation of grief, anger, determination, healing, and hope. The intimate collection includes poetry, eyewitness accounts, letters, speeches, journal entries, drawings, and photographs from the events of February 14 and its aftermath. Full of heartbreaking loss, a rally cry for change, and hope for a safe future, these artistic pieces will inspire readers to reflect on their own lives and the importance of valuing and protecting the ones you love.

The Impersonal Life Mar 27 2020 To you, who, through long years and much running to and fro, have been eagerly seeking, in books and teachings, in philosophy and religion, for you know not what—Truth, Happiness, Freedom, God; To you whose Soul is weary and discouraged and almost destitute of hope; To you, who many times have obtained a glimpse of that "Truth" only to find, when you followed and tried to reach it, that it disappeared in the beyond, and was but the mirage of the desert; To you, who thought you had found it in some great teacher, who was perhaps the acknowledged head of some Society, Fraternity or Religion, and who appeared to you to be a "Master," so marvelous was the wisdom he taught and the works he performed;—only to awaken later to the realization that that "Master" was but a human personality, with faults and weaknesses, and secret sins, the same as you, even though that personality may have been a channel through which were voiced many beautiful teachings, which seemed to you the highest "Truth;" And here you are, Soul weary and hungered, and not knowing where to turn— To you, I AM come. Likewise to you, who have begun to feel the presence of that "Truth" within your Soul, and seek the confirmation of that which of late has been vaguely struggling for living expression within; Yes, to all you who hunger for the true "Bread of Life," I AM come. Are you ready to partake?
